

pocket wifi is an innovative solution helping travellers better manage international mobile data roaming costs in one of 36 countries, with more to follow shortly.

Remain completely mobile and connected, paying local rates. International data roaming is no longer dependent on Wi-Fi hotspots ...perfect for on-the-go connectivity!

The key benefits are significant reductions on international data roaming costs, improved coverage & speeds and the flexibility to share the data connection with up to 5 devices.

pocket wifi gives you the freedom to travel your world connected like a local – leave your roaming fears behind! Enjoy wireless Internet wherever you go. It works just like a Wi-Fi hotspot, but it's personal and fits in your pocket. Connect instantly with a click of a button.

Internet access is of little use if it cannot be shared; for this reason, pocket wifi connects up to 5 devices simultaneously.

- **Reduced roaming charges** - local data rates v roaming rates
- **Improved coverage** – use of the mobile networks coverage negates any requirement for Wi-Fi hotspots
- **High speed** - support HSPA mobile access
- **Flexibility** – connect up to 5 devices simultaneously
- **Improved cost control** – known costs are based on the rental period with at least 50MB/day – unlimited plans available
- **Convenience** – book, receive & connect, return. Simple
- **Security** - Supports WEP/WPA2 encryption
- **Shared network resources** - file sharing or storage (32GB) from all connected devices

available in 36 countries - Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Moldova, Norway, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, UK and Ukraine. Australia, Hong Kong and USA are **new**; **more** will arrive in the near future

Service Detail

pocket wifi is your own cloud of connectivity; great for personal and business use providing mobile data roaming for your phone while simultaneously allowing instant access to email/web/VoIP from your laptop, tablet or any other personal device.

pocket wifi is a credit-card sized device that connects automatically to the available mobile data networks, utilising HSPA (7.2Mbps download & 5.76Mbps upload) speeds where possible to enable Internet on your devices.

Unlimited data or at least 50MB per day

Our daily bandwidth limits per country are ample for frequent web browsing, email and application usage on smartphones. Unlimited Internet plans area available in Italy, France, Germany, Spain and the United Kingdom.

With execMobile's pocket wifi rental and a click of a button you will have your own wireless internet connection, wherever you want. It's as simple as:

book - select your travel dates and provide a delivery address

receive & connect - guaranteed delivery to your destination (hotel, offices or residential address) or home (delivery to your home prior to departure). Collection points are also available in UK airports with more to follow. Simply turn on to be instantly connected.

return - post back via the pre-paid courier envelope or drop-off as agreed.

pocket wifi is a pre-paid service, however corporate customers can apply for a post-paid service or join our Membership Program. We work on a pay as you go basis, so there are no contracts or bills at the end that have not been agreed up front.

Why execMobile

execMobile is committed to addressing the high costs of mobility by introducing globally recognised innovative solutions into the South African market place.
